Karnataka scraps liquor price control structure

Adopts alcohol-based tax regime; 'progressive' move, says industry

ANEKA CHATTERJEE
Bengaluru, 6 March

The Karnataka government on Friday announced a series of reforms in the liquor taxation and regulatory framework, including the introduction of a new alcohol-based duty structure, deregulation of price fixation, and technology-driven monitoring systems.

Industry experts say the move, aimed at improving transparency and easing compliance, could boost premium Indian spirits categories.

Chief Minister Siddaramaiah, presenting the Budget for a record 17th time, also set a revenue target of about ₹45,000 crore for 2026-27 from the state's excise department. Karnataka's excise revenue collections as of February in 2025-26 stood at about ₹36,492 crore, up 12.7 per cent year-on-year.

As part of the overhaul, the state plans to end direct price control over the liquor industry from April and introduce a new duty structure based on alcohol content. "An alcohol-in-beverage (AIB)-based excise duty structure is globally recognised as the gold standard for alcohol taxation, as it directly targets the alcohol content, which is the primary source of negative externalities," Siddaramaiah said.

Under the proposed system, there will be a uniform excise duty, while an additional excise duty (AED) will be levied within a defined range based on ex-factory price slabs. Another major shift is the complete deregulation of government-administered price fixation.

"Karnataka is one of India's largest beer-consuming states. Until now, the concept of alcohol strength-based taxation was largely followed only in Western countries. By adopting this approach, Karnataka becomes the first state in India to eliminate long-standing disparities in the taxation of different alcoholic beverages," said a liquor company executive, wishing anonymity.

To promote alcohol tourism, distilleries and breweries will also be allowed to conduct tasting sessions and sell products directly to tourists. According to the Indian Malt Whisky Association (IMWA), these steps signal a broader shift towards recognising quality-driven categories such as Indian single malts and premium craft spirits.

Chief Minister Siddaramaiah has set a revenue target of ₹45,000 crore from the state's excise department for 2026-27

"A transparent and simplified excise structure can encourage responsible growth, foster innovation among domestic distillers, and create a more level playing field for premium Indian spirits," said Rajesh Chopra, director general of IMWA.

The Brewers Association of India (BAI) described the AIB-based excise duty structure as a landmark reform in alcohol taxation. "Linking taxation with the quantity of alcohol in the product is based on the premise that the product to be taxed is alcohol and not water," said Vinod Giri, director general of BAI, adding that AIB-based taxation is encouraged by bodies such as the World Health Organization.

Bengaluru-based United Breweries Limited (UBL), which produces Kingfisher and Heineken-branded beers, said the measures were steps in the right direction while noting that beer has significant growth potential in Karnataka.

Sanjit Padhi, CEO of the International Spirits and Wine Association of India, said market-driven pricing benefits consumers, the government, and suppliers alike.

However, some industry players flagged areas of concern. Anant S Iyer, director general of the Confederation of Indian Alcoholic Beverage Companies, said that while the rationalisation of excise slabs is a positive step, any increase in duty on lower-priced segments could affect sales. He noted that slabs one to four account for 85-90 per cent of spirits sales in Karnataka, making them the primary drivers of excise revenue.

Liquor stocks buzz after Karnataka excise policy shift

Fadnavis announces farm loan waiver, 4th Mumbai plans

PRESS TRUST OF INDIA
Mumbai, 6 March

The Maharashtra government on Friday announced a farm loan waiver of up to ₹2 lakh in the 2026-27 Budget, which also focuses on river-linking projects, women empowerment, youth development, health, startups and strengthening social welfare schemes.

Chief Minister Devendra Fadnavis, who holds the finance portfolio, presented a ₹769,467 crore Budget, and said Ladki Bahin Yojana, launched ahead of Assembly polls in 2024, will continue with adequate allocation for the scheme targeted at poorer women, who get ₹1,500 a month.

Fadnavis, who said Maharashtra will be a \$5 trillion economy by 2047, became the first chief minister of the state to present a Budget.

Fadnavis said revenue receipt in the next financial year is estimated at ₹6.16 trillion and revenue expenditure at ₹6.56 trillion. Thus, revenue deficit is projected at ₹40,552 crore in 2026-27, he stated.

Fiscal deficit is estimated at ₹1.5 trillion, the CM maintained, adding the government has been successful in keeping the fiscal deficit (shortfall between total income and expenditure) below 3 per cent of the GSDP (Gross State Domestic Product).

He said the state's revenue deficit has consistently remained below 1 per cent of the GSDP.

The CM said a third Mumbai will be developed around the Atal Setu area in Raigad district. A fourth Mumbai is planned near Vadhan Port in Palghar district.

Focus on making agri products globally competitive: Modi

PRESS TRUST OF INDIA
New Delhi, 6 March

Prime Minister Narendra Modi on Friday asked farmers to leverage India's diverse climate to increase productivity and export strength, and stressed on scaling up high-value crop produce to make the country's agri products globally competitive.

Addressing a post-Budget webinar on 'Agriculture and Rural Transformation', Modi called for a "unified approach involving experts, industry, farmers and farmers to meet global quality and branding standards", and highlighted the importance of setting clear goals to connect local farmers with global markets. "Today the world markets are opening, and global demand is shifting... It is necessary to have more discussion on making our agriculture export-oriented. We have a diverse climate, and we must take full advantage of it. We are rich in agro-climatic zones," he said.

The prime minister noted that the export-oriented production would lead to rural

Modi called for a unified approach involving experts, industry, farmers to meet global quality

employment through processing and value addition.

The Budget for 2026-27 has also focused on high-value agriculture, including cashew, cocoa, sandalwood, Modi said, adding that the National Mission on Edible Oil and Pulses and the National Mission on Natural Farming are all strengthening the agriculture sector.

He also highlighted the budget proposal of promotion of Agarwood in the North East, and temperate nut crops in the Himalayan states.

"If we scale high-value agriculture together, it will transform agriculture into a globally competitive sector," Modi added. The prime minister said that today the world is becoming more conscious about health, with a strong focus on holistic health care and organic food.

"We must place greater emphasis on chemical-free and natural farming. Natural farming creates a highway to reach markets across the world," he said.

Stressing that agriculture is also a strategic pillar of India's long-term development journey, he said that the government has continuously strengthened the agriculture sector. "Nearly 10 crore farmers have received more than ₹4 lakh crore through the PM Kisan Samman Nidhi. This year's Union Budget gives a strong push to agriculture and rural transformation," Modi added. On the fisheries sector, Modi said India is the world's second-largest fish producer with about 450,000 tonnes of fish being produced in our various reservoirs.

The meeting convened by the Department of Financial Services (DFS) last month was also attended by the Insurance Regulatory and Development Authority of India (Irdai) and ministries, such as the rural development ministry, as part of the government's push to achieve the goal of "Insurance for All by 2047".

"There is a clear view that while coverage has expanded significantly, the sum assured under micro-insurance products may need an upward revision to remain meaningful," a senior government official said.

An email sent to the Finance Ministry remained unanswered until press time.

PMSBY has recorded enrolments of 562 million, while PMJJBY enrolments stand at 263 million. Digital enrolments through the Jan Suraksha portal have further streamlined access to these schemes. In the agriculture segment, the Pradhan Mantri Fasal Bima Yojana has provided coverage to 55 million farmers, including 53 million during the Rabi season, reflecting continued participation in crop insurance. Meanwhile, Ayushman Bharat IDs have crossed 80 million, strengthening the health insurance ecosystem.

2 IAF pilots killed in Su-30 crash in Assam

BHASKAR KUMAR
New Delhi, 6 March

The Indian Air Force (IAF) on Friday confirmed the deaths of Squadron Leader Anuj and Flight Lieutenant Purvesh Duragkar after a Sukhoi Su-30MKI combat aircraft crashed in Assam's Karbi Anglong district during a training mission.

The IAF posted on X that all its personnel expressed sincere condolences and stood firmly with the bereaved families. "IAF acknowledges the loss of Sqn Ldr Anuj and Flt Lt Purvesh Duragkar, who sustained fatal injuries in the Su-30 crash. All personnel of the IAF express sincere condolences and stand firmly with the bereaved family in this time of grief," the statement said.

Earlier, during the intervening night, the IAF had said that an Su-30MKI aircraft on a training sortie had crashed in the Karbi Anglong area, about 60 kilometres from Jorhat. Search operations had been launched immediately after the incident.

The aircraft had taken off from the IAF's Jorhat airbase and was later reported overdue. The last contact with the fighter jet was recorded at around 7:42 pm on Thursday.

The Su-30MKI is one of the Indian Air Force's frontline heavy combat aircraft and forms the backbone of its fighter fleet. India operates more than 250 Russian-origin Su-30MKI jets, most of which were licence-produced by Hindustan Aeronautics Limited.

India has paid Russia more than \$12 billion for these aircraft over the years.

ALL IN A DAY

Navy's first AIP-equipped submarine expected to be ready by year-end

The Indian Navy's first submarine equipped with advanced technology to enhance its underwater endurance and stealth is expected to be ready by the end of 2026, when the second of the six French-origin Kalvari (Scorpene)-class submarines in its fleet will have been fitted with an indigenous air-independent propulsion (AIP) system, a defence source told *Business Standard* on Friday. Between December 2017 and January 2025, six Kalvari-class conventional diesel-electric attack submarines were commissioned into service. The vessels were built by the state-run Mazagon Dock Shipbuilders Ltd under a transfer-of-technology arrangement with France's Naval Group. "The first submarine is already undergoing refit and will therefore not be fitted with an AIP system at present. The second vessel, however, will enter refit in the middle of the year and will become the first submarine in Indian service to be equipped with this technology," said the source.

CISF to look after drone security to protect critical infrastructure: Shah

Union Home Minister Amit Shah said the Central Industrial Security Force (CISF) will now be responsible for aerial threat management at critical sites, including airports, seaports and industrial hubs, apart from its existing responsibilities. Addressing the 57th Raising Day ceremony, Shah said the CISF has been entrusted with the role of a nodal agency for drone security to protect critical infrastructure.

Stalin unveils TN vision for 2030, says country should become egalitarian

Chief Minister M K Stalin unveiled his vision for "Tamil Nadu 2030". He said the country should become egalitarian and social justice should prevail everywhere. "District-wise action plans would be formulated in order to ensure the aspirations are met," the Chief Minister said while speaking at a discussion on "Unga Kanavu Sollunga" (Tell your dreams).

Expressway network to support 27 industrial parks

VIRENDRA SINGH RAWAT
Lucknow, 6 March

Uttar Pradesh (UP) has over 50 per cent of India's current expressway length and will leverage this expressway network to support 27 industrial parks across the state.

These industrial parks and clusters, dedicated to manufacturing, electronics, and logistics, will be developed near 22 expressways in UP, which are either operational, under construction or in the pipeline.

At present, Uttar Pradesh has seven expressways. These include Purvanchal Expressway, Bundelkhand Expressway, Agra-Lucknow Expressway, Yamuna Expressway, Delhi-Meerut Expressway, Noida-Greater Noida Expressway, and Gorakhpur Link Expressway.

Three expressways are under construction, including Ganga Expressway and Lucknow-Kanpur Expressway, while 12 new expressway projects have been proposed by the government.

"The under-construction and proposed expressways will entail a total investment of almost ₹one trillion going forward," a senior UP official said.

Among the largest expressway projects in India is the under-construction 594-km Ganga Expressway from Meerut to Prayagraj. It is nearing com-

pletion and is expected to be commissioned soon.

The official said the "expressway-based development model" will boost UP's economy and generate mass employment once the 27 industrial parks flanking them start taking shape.

During his recent visit to Japan, UP Chief Minister Yogi Adityanath invited Japanese investors by highlighting the state's network of expressways and proposed industrial clusters.

Apart from UP, these expressways also provide seamless connectivity to the National Capital Region (NCR).

Among the 12 proposed expressways in UP are 320-km Vindhya Expressway, connecting Prayagraj to Sonbhadra, Gorakhpur-Shamli Expressway, Chitrakoot Link Expressway, Jhansi Link Expressway, Vindhya Purvanchal Link Expressway, Agra-Lucknow Expressway, Purvanchal Expressway Link Expressway, Agra-Lucknow Expressway, and the Ganga Link Expressway.

The growing expressway network will catalyse the development of manufacturing units, warehousing facilities, and logistics parks. According to "Invest UP", industrial corridors/parks, and investment zones are being developed along the expressways to provide investors with quick access to land, transportation, and markets.

RAJASTHAN

Govt to set up ₹2,000 cr fund for school infra

ANIL SHARMA
Jaipur, 6 March

The Rajasthan government is going to establish a school infrastructure fund with an allocation of ₹2,000 crore for the repair, reconstruction, and strengthening of dilapidated school buildings, state Parliamentary Affairs, Law and Justice Minister, Jogaram Patel, said.

More than 1,500 classrooms, labs, and computer labs will be constructed in schools for ₹200 crore, he said.

The government also plans to establish the Major Shaitan Singh Skill Development and Training Centre in Jodhpur, to facilitate training for competitive examinations for military families, the minister said.

Approximately ₹323 crore will be spent in schools and Anganwadi centres across the state, to provide sports equipment for children's overall development and play-based education, Patel said.

He stated that AI-based personalised learning labs will be established in 1,000 schools across the state.

The current era is one of artificial intelligence, and the vision of a developed India by 2047 can only be realised by connecting rural children with modern technology, Patel added.

He pointed out that the size of the state's economy has increased by 41.39 per cent under the current government.
